ABSTRAK

Koperasi Simpan Pinjam Rezky Mentari saat ini dalam proses pencatatannya masih menggunakan cara manual. Berawal dari warga sekitar yang semakin lama anggotanya terus bertambah, maka terbentuklah Koperasi Simpan Pinjam Rezky Mentari. Masalah yang dihadapi yaitu data yang belum terintegrasi, yang mengakibatkan informasi yang dihasilkan menjadi saling tumpang tindih antar bagian, dan mengakibatkan lambatnya dalam melayani anggota Koperasi Simpan Pinjam Rezky Mentari. Dengan adanya permasalahan tersebut dibutuhkan perancangan architecture enterprise yang dapat meminimalisir permasalahan yang ada, salah satunya yaitu dengan menggunakan metode The Open Group Architecture Framework Architecture Development Method (TOGAF ADM) yang terdiri dari Preliminary Phase, Requirement Management, Architecture Vision, Business Architecture, Information System architecture, Technology Architecture, Opportunities and Solution, Migration Planning, Implementation Governance, dan Architecture Change Management. Hasil dari penelitian ini agar menghasilkan rancangan blueprint yang mempermudah bagian anggota, administrasi, teller, dan manager memperoleh informasi dengan akurat, relevan, dan tepat waktu.

ABSTRACT

The recording process of Koperasi Simpan Pinjam Rezeky Mentari still use manual way. Started from the citizens around the longer its member continue to grow, then formed Koperasi Simpan Pinjam Rezeky Mentari Rembang. The problem faced was the data not yet integrated so that it caused the result of information became mutually overlap among parts and the member of Rezeky Mentari Credit Union service was slow- moving. Based on the problem, it was needed architecture enterprise design which can minimize the problem. One of them by using The Open Group Architecture Framework Architecture Development Method (TOGAF ADM) method consisted Preliminary Phase, Requirement Management, Architecture Vision, Business Architecture, Information System architecture, Technology Architecture, Opportunities and Solution, Migration Planning, Implementation Governance, dan Architecture Change Management. From result of this research method to produce blueprint program which facilitated members, administration, teller, and manager to obtain accurate and relevant information on time.
