## **ABSTRAK**

Banyak faktor yang mendukung keberhasilan program akreditasi yang dilakukan atau untuk mempertahankan pengakuan akreditasi di sebuah rumah sakit. Salah satu dari penilaian akreditasi adalah kelengkapan dokumen rekam medis yang sesuai dengan elemen penilaian dari standar JCI.

Jenis penelitian ini merupakan penelitian deskriptif dengan metode observasi dan pendekatan cross sectional. Populasi dalam penelitian ini adalah 400 dokumen rekam medis pasien rawat inap bangsal Rajawali 4B, jumlah sampel 80 dokumen rekam medis pasien rawat inap dengan metode teknik simple random sampling.

Hasil penelitian terhadap 80 sampel didapatkan prosentase berdasarkan standar AP.1.7 untuk skrining nyeri 2,5% tidak lengkap, standar PPKP.2 mengenai edukasi pasien 8,75% tidak lengkap, standar APKP.3.2.1 tentang resume pulang 11,25% tidak lengkap, dan standar APKP.4.4 untuk transfer pasien ada 10% tidak lengkap.

Saran dari peneliti perlu adanya kesadaran dan kedisiplinan kepada petugas pengisi rekam medis, sosialisasi kepada petugas pencatat dokumen rekam medis akan arti pentingnya kelengkapan pengisian dokumen rekam medis dalam program akreditasi. Sebaiknya petugas pencatat dokumen rekam medis meneliti kembali dokumen rekam medis sebelum meninggalkan bangsal.

## **ABSTRACT**

There are many factors that contributes to the success of achieving the accreditation or to maintain the recognition of hospitalaccreditation. One of the reviews is the documentation of medical records in accordance with the assessment element of JCI standards. The purpose of this study is to identify and explain the medical record documents in accordance to the assessmentelements of JCI standards.

This type of research is a descriptive study with observation and cross-sectional approach. The population in this study are 400 documents medical records of hospitalized patients. The samples are 80 medical records documentsof hospitalized patient with simple random sampling method.

Results of a study of 80 samples obtained shows that a percentage based on screening standards for pain AP.1.7 there is 2.5% incomplete, PPKP.2 standard patient education there is 8.75% incomplete resume APKP.3.2.1 standard home there is 11.25% incomplete, and the standard of patient transfer APKP.4.4 there is 10% incomplete.

Based on the findings, it is suggested to arise the need for awareness and discipline to the medical records officer, socializeimportance completeness of medical record documents in the accreditation program to the medical record documents register personnel. The documents should re-examine by the medical records officers before leaving the ward.
