ABSTRAK

Tabel distribusi normal (Distribusi Gausse) yang semula di buku dipindah ke handphone. Dalam mengerjakan soal pengujian distribusi normal (Distribusi Gausse) tidak akan kesulitan lagi mengetahui nilai tabel z atau tabel distribusi normal (Distribusi Gausse). Dengan begitu diharapkan pengguna dapat mengerjakan soal pengujian distribusi normal (Distribusi Gausse), tanpa takut lupa membawa tabel atau tidak tahu cara membaca tabel. Program ini selain dapat mengatasi permasalahan pengguna seperti mahasiswa dalam menyelesaikan soal distribusi normal (Distribusi Gausse). Juga dapat di pakai dalam dunia nyata, untuk melakukan penelitan misal melakukan penelitian di perusahaan-perusahaan. Penelitian yang dilakukan oleh perusahaan seperti untuk mencari nilai dari prosentasi kinerja karyawan, prosentasi produk perusahaan dan penelitian lainnya.

ABSTRACT

Table the normal distribution (distribution gausse) who was initially in books moved to the cell phone. In doing the testing the normal distribution (distribution gausse) will have no trouble again know the value of z table or table the normal distribution (distribution gausse). So that it was expected of users can doing the testing the normal distribution (distribution gausse), without fear of had forgotten to bring table or not know how to read tables. This program in addition to solve the problems such as students users in resolving about the normal distribution (distribution gausse). Can also be in use in the real world, to research covered for carrying out a study in several companies. Research conducted by companies like to find the value of the percentage of employee performance, percentage products companies and other study.
